

ARTIFICIAL INTELLIGENCE ADVISORY SERVICES

Data Readiness and AI Strategy: Bridging the Governance Gap

Launching and scaling AI initiatives is complex — our specialized advisory services bring clarity, structure and strategic alignment.

At First San Francisco Partners (FSFP), we guide businesses still mastering the fundamentals of structured, operational data in advancing their data foundations and articulating clear, actionable outcomes for their AI endeavors.

TAILORED AI STRATEGIES TO FIT YOUR NEEDS

Our team of data consultants and AI implementation consultants can assist with:

STRATEGIC VISIONING AND DETERMINING WHERE

TO START / AI, for AI's sake, will have limited impact on your organization. Our artificial intelligence advisory services help you define clear objectives tied to business outcomes and identify initial, value-producing use cases.

CLOSING THE GOVERNANCE GAP / AI increasingly consumes unstructured data, which largely remains ungoverned. Understand how the journey from structured to unstructured data is an evolution and know the key maturity milestones to aim for.

DEFINING AI USE CASES AND BUILDING EXECUTION ROADMAPS / A solid AI use case speaks to both your operational requirements and strategic value. Learn how to compile a use case that addresses your people, as well as the policies, processes, data and technologies needed for execution and enterprise-level planning.

DESIGNING AN AI GOVERNANCE FRAMEWORK

With AI, your organization needs to govern the application of data as much as the technical components that enable it. Understand the components of AI governance and the right AI implementation framework to map across your functional areas, teams and roles.

INCREASING DATA FLUENCY AND AI LITERACY Extracting the most value from AI requires knowing how to interact effectively. Discover what learning approaches, techniques and plans, including AI literacy training, you need to increase literacy across all levels of your organization.

BUILDING AN ORGANIZATIONAL CULTURE AROUND AI / Some individuals are early adopters of AI, while others are silent resisters. Learn about the various methods, tools and communication strategies to identify the best ways to convert even the staunchest resisters into AI champions.

REALIZE AI'S FULL POTENTIAL, GUIDED BY FSFP

Undoubtedly, there are risks associated with implementing generative AI. But there are also risks to your business if you don't get started.

FSFP's artificial intelligence advisory services help you invest, experiment and refine your AI strategies effectively. For a deeper look at how we guide business leaders to AI success, explore our [Modern Data and AI Enablement Framework](#) informational sheet.
